Possible manipulation (engine v1, study 1)

Beneish M-score
- Value: component not computable: DEPI
- Alert by the study 1 rule: does not trigger alerts
- Rule: M > −1.78 (pre-registration, section 4)
- Percentile in sector and year: —
- Percentile in group and year: —
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: low

DSRI, days' sales in receivables index
- Value: 2.388 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 93 (n = 38)
- Percentile in group and year: 96 (n = 457)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

GMI, gross margin index
- Value: −0.085 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 7 (n = 38)
- Percentile in group and year: 4 (n = 471)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

AQI, asset quality index
- Value: 1.533 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 96 (n = 38)

Percentile in group and year: 94 (n = 468)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

SGI, sales growth index
Value: 0.163 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 1 (n = 38)
Percentile in group and year: 1 (n = 472)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DEPI, depreciation index
Value: missing account: depreciation, cash flow lines in section 6.01.01
M-score component; it has no rule of its own
Percentile in sector and year: —
Percentile in group and year: —
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: low

SGAI, SG&A expenses index
Value: 7.716 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 99 (n = 38)
Percentile in group and year: 99 (n = 465)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

TATA, total accruals to total assets
Value: −0.382 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 1 (n = 38)
Percentile in group and year: 4 (n = 487)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

LVGI, leverage index
Value: 1.614 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 96 (n = 38)
Percentile in group and year: 96 (n = 480)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DPO jump
Value: 90.5 days
Alert by the study 1 rule: yes
Rule: DPO change in the year's top decile among non-financial companies (≥ 90th percentile of computable values on the date: 32.5 days)
Percentile in sector and year: 88 (n = 37)
Percentile in group and year: 95 (n = 440)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Bargaining power with suppliers and a change in purchase mix (decision of 2026-11-07)

Implied interest rate minus average CDI
Value: 14.88 p.p.
Alert by the study 1 rule: yes
Rule: implied interest rate above the year's average CDI rate + 10 p.p. (pre-registration, section 4)
Percentile in sector and year: 68 (n = 36)
Percentile in group and year: 73 (n = 439)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Expensive debt, exchange differences and lease interest inside finance costs (decision of 2026-11-07)

Accruals to average total assets
Value: −0.345 (index)
Alert by the study 1 rule: does not trigger alerts
Percentile in sector and year: 1 (n = 38)
Percentile in group and year: 4 (n = 486)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

Financial risk (context only)

Altman Z" (financial risk, context only)
Value: −3.547 (index)
Components: X1 = −0.142; X2 = −0.067; X3 = −0.362; X4 = 0.032 (indices)
Percentile in sector and year: 6 (n = 40)
The company's own history: fewer than 5 previous fiscal years with a value
- No cut-off zone: the available source does not define zones for Z"
- Coefficients estimated outside Brazil; bankruptcy models lose validity over time (Pereira and Martins 2015, p. 25)

Financial quality (context only)

Piotroski F (financial quality, context only)
Value: F = 1/9 (8 computable)
Signals:
- Return on assets (ROA): 0
- Operating cash flow on assets (CFO): 0
- Change in ROA: 0
- Cash above earnings (ACCRUAL): 1
- Change in leverage: 0
- Change in current ratio: 0
- No equity issuance (EQ_OFFER): —
- Change in gross margin: 0
- Change in asset turnover: 0
- No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Restatement through the following year's comparative: no difference above the tolerance, or the next year's DFP did not exist yet on the date.

53 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
Excerpt checked literally: "Em nossa opinião, as demonstrações contábeis acima referidas, apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da TECNOSOLO ENGENHARIA S.A., em 31 de dezembro de 2012, o desempenho de suas operações, o fluxo de caixa e o valor adicionado para o exercício findo naquela data, de acordo com as práticas contábeis adotadas no Brasil.Ênfase7."
Auditor in the 2021 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor in the 2022 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor in the 2023 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2012: Audipec Auditoria e Perícia Contábil S/S -> Tag Auditoria e Consultoria Empresarial S/S. The outgoing firm audited 7 consecutive fiscal years (2005 to 2011), by the start and end dates in the FCA.
- 2016: Tag Auditoria e Consultoria Empresarial S/S -> Audipec Auditoria e Perícia Contábil S/S (transition: two firms in the 2016 FCA). The outgoing firm audited 4 consecutive fiscal years (2012 to 2015), by the start and end dates in the FCA.
- 2021: Audipec Auditoria e Perícia Contábil S/S -> Tag Auditoria e Consultoria Empresarial S/S. The outgoing firm audited 5 consecutive fiscal years (2016 to 2020), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Resolution No. 23/2021, in force when the new firm started).

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Document excerpts (copied; no alert)

Excerpts copied from the documents, with the page, and the Reference Form table. It is not a signal family: it generates no alert, score or ranking. Absence of mention does not prove absence.
How the reader was tested: 20 held-out cases, a single measurement with the frozen reader (c99c953): precision 0.962, coverage 0.962, literal check on 132 of 132 excerpts, no natural-person name (docs/leitor_medida.json).

Explanatory notes · Related parties
Note: 3.3.8. Transações entre Partes Relacionadas (pages 4 to 4)

Explanatory notes · Reverse factoring and forfaiting
The reader found no mention of reverse factoring (risco sacado), forfaiting or supplier agreements in the notes of this DFP. Absence of mention does not prove absence of the operation.

Auditor's report
Type of opinion: unqualified
- [emphasis of matter] “Ênfase 7. As Demonstrações Contábeis estão preparadas no pressuposto da continuidade normal de suas operações. Em face dos atrasos contumazes por parte de seus clientes do setor público, a empresa passou a enfrentar problemas graves de liquidez, com um descompasso em seu fluxo de caixa gerando insuficiência de capital de giro, ora refletindo em aumento do endividamento, declínio do faturamento e inclusive a impossibilidade de estabelecer novos contratos. Houve reflexo no atraso do pagamento de empréstimos bancários, no recolhimento de impostos, de suas obrigações sociais e trabalhistas, além de outras, assim estabelecendo a necessidade de implementação de um Plano de Recuperação financeira para restabelecer a normalidade de suas atividades. As Demonstrações Contábeis foram preparadas de acordo com as práticas contábeis aplicáveis a uma empresa em continuidade normal de negócios e não incorporam quaisquer ajustes contábeis que seriam necessários na hipótese de uma descontinuidade operacional definitiva. 8.” (cut at the end of a sentence, original excerpt in Portuguese)
- Excerpt omitted; see the auditor's report in the document

Reference Form
There is no Reference Form for this fiscal year in the open data.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested
In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits
- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations
- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 36 DFP lines, each with document, version, filing date, account and location.
