Auditor's report and auditor (factual section; no alert)

Auditor's report: Com Ressalva (qualified).
no opinion excerpt was found in the text
Auditor in the 2021 FCA: Next Auditores Independentes S/S.
Auditor in the 2022 FCA: Next Auditores Independentes S/S.
Auditor in the 2023 FCA: Next Auditores Independentes S/S.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2013: entry of BDO RCS Auditores Independentes SS, with no other firm leaving.
- 2014: BDO RCS Auditores Independentes SS -> CHRONUS - Auditores Independentes S/S. The outgoing firm audited 1 consecutive fiscal years (2013 to 2013), by the start and end dates in the FCA.
- 2014: exit of Martinelli Auditores, with no other firm entering. The outgoing firm audited 3 consecutive fiscal years (2010 to 2012), by the start and end dates in the FCA.
- 2016: CHRONUS - Auditores Independentes S/S -> Berkan Auditores Independentes S/S. The outgoing firm audited 1 consecutive fiscal years (2014 to 2014), by the start and end dates in the FCA.
- 2020: Berkan Auditores Independentes S/S -> Next Auditores Independentes S/S. The outgoing firm audited 5 consecutive fiscal years (2015 to 2019), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Avaliação dos investimentos pelo método da equivalência patrimonial Conforme descrito na nota explicativa 2 – Bases de preparação das demonstrações financeiras, as demonstrações financeiras individuais foram elaboradas de acordo com as práticas contábeis adotadas no Brasil. Reference Form
Form of 2013, version 3, filed on 2014-01-20.
The Reference Form lists no related-party transactions in the table. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
