Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
no opinion excerpt was found in the text
Auditor in the 2013 FCA: Michelon & Cia Auditores e Consultores SS.
Auditor in the 2014 FCA: Michelon & Cia Auditores e Consultores SS.
Auditor in the 2015 FCA: Baker Tilly Brasil RS Auditores Independentes SS.
Auditor changes (one line per change, canonical name by the firm's CVM code):
- 2012: DRS Auditores -> Michelon & Cia Auditores e Consultores SS. The outgoing firm audited 5 consecutive fiscal years (2007 to 2011), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2015: Michelon & Cia Auditores e Consultores SS -> Baker Tilly Brasil RS Auditores Independentes SS. The outgoing firm audited 3 consecutive fiscal years (2012 to 2014), by the start and end dates in the FCA.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Auditor's report
Type of opinion: unqualified

- [emphasis of matter] “Ênfase Conforme descrito na nota explicativa 2, as demonstrações contábeis individuais foram elaboradas de acordo com as práticas contábeis adotadas no Brasil. No caso da Recrusul S/A, essas práticas diferem da IFRS, aplicável às demonstrações contábeis separadas, somente no que se refere à avaliação dos investimentos em controladas, coligadas e controladas em conjunto pelo método de equivalência patrimonial, enquanto que para fins de IFRS seria custo ou valor justo. Nossa opinião não está ressalvada em função desse assunto. Conforme descrito na nota explicativa 3.2, as demonstrações contábeis referentes aos exercícios findos em 31 de dezembro de 2014 denominadas de “Controladora” e “Consolidado” foram preparadas no pressuposto da continuidade normal dos negócios da Recrusul S/A e suas controladas, que tem apresentado prejuízos operacionais e deficiências de capital de giro.” (cut at the end of a sentence, original excerpt in Portuguese)
- Excerpt omitted; see the auditor's report in the document

Reference Form
The Reference Form for this fiscal year was not available on the date. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested
In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits
- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations
- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
