Possible manipulation (engine v1, study 1)

Financial risk (context only)

Altman Z'' (financial risk, context only)
  Value: −2.006 (index)
  Components: X1 = −0.171; X2 = −0.286; X3 = −0.012; X4 = 0.117 (indices)
  Percentile in sector and year: 3 (n = 56)
  The company's own history: fewer than 5 previous fiscal years with a value
  - No cut-off zone: the available source does not define zones for Z''
  - Coefficients estimated outside Brazil; bankruptcy models lose validity over time (Pereira and Martins 2015, p. 25)

Financial quality (context only)

Piotroski F (financial quality, context only)
  Value: F = 3/9 (7 computable)
  Signals:
    - Return on assets (ROA): 0
    - Operating cash flow on assets (CFO): 0
    - Change in ROA: 1
    - Cash above earnings (ACCRUAL): 1
    - Change in leverage: 1
    - Change in current ratio: 0
    - No equity issuance (EQ_OFFER): —
    - Change in gross margin: —
    - Change in asset turnover: 0
  - No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Restatement through the following year's comparative: no difference above the tolerance, or the next year's DFP did not exist yet on the date.

What was known on the date

53 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Com Ressalva (qualified).
no opinion excerpt was found in the text
Auditor in the 2011 FCA: VGA Auditores Independentes.
Auditor in the 2012 FCA: UHY Moreira Auditores.
Auditor in the 2014 FCA: UHY Moreira Auditores.
Auditor changes (one line per change, canonical name by the firm's CVM code):
- 2012: VGA Auditores Independentes -> UHY Moreira Auditores. The outgoing firm audited 1 consecutive fiscal years (2011 to 2011), by the start and end dates in the FCA.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Document excerpts (copied; no alert)

Excerpts copied from the documents, with the page, and the Reference Form table. It is not a signal family: it generates no alert, score or ranking. Absence of mention does not prove absence.
How the reader was tested: 20 held-out cases, a single measurement with the frozen reader (c99c953): precision 0.962, coverage 0.962, literal check on 132 of 132 excerpts, no natural-person name (docs/leitor_medida.json).

Explanatory notes · Related parties
The reader found no note with "partes relacionadas" (related parties) in the title.

Explanatory notes · Reverse factoring and forfaiting
The reader found no mention of reverse factoring (risco sacado), forfaiting or supplier agreements in the notes of this DFP. Absence of mention does not prove absence of the operation.

Auditor's report
Type of opinion: qualified
- Excerpt omitted; see the auditor's report in the document
- [emphasis of matter] “Ênfase As demonstrações contábeis individuais e consolidadas apresentam índices financeiros adversos de forma contínua e excessiva participação de passivo circulante em comparação com o ativo circulante, uma vez que a empresa não aufere receita. A Concessão para exploração do Porto terminou em dezembro de 2012 e as demonstrações contábeis demonstram as alterações referentes às reversões resultantes do encerramento da atividade fim da concessão, mas foram preparadas no pressuposto da continuidade dos negócios e não incluem quaisquer ajustes em caso de descontinuidade. Nossa opinião não contém modificação em função desse assunto.” (original excerpt in Portuguese)
- [other matters] “Outros assuntos Demonstrações do valor adicionado individual Examinamos,

também, as demonstrações do valor adicionado (DVA) individual, referente ao exercício findo em 31 de dezembro de 2013, elaborada sob a responsabilidade da administração da COMPANHIA DOCAS DE IMBITUBA, cuja apresentação é requerida pela legislação societária brasileira para companhias abertas, e como informação suplementar pelas IFRSs, que não requerem a apresentação da DVA. Essa demonstração foi submetida aos mesmos procedimentos de auditoria descritos anteriormente e, em nossa opinião, exceto pelo contido nos parágrafos base para opinião com ressalva sobre as informações contábeis individuais, estão adequadamente apresentadas, em seus aspectos relevantes, em relação às informações contábeis individuais tomadas em conjunto.”
(cut at the end of a sentence, original excerpt in Portuguese)

Reference Form
Form of 2014, version 1, filed on 2015-04-29.
It is the only version available in the open data; earlier versions are not there.
- Related party (name omitted) · nenhuma · nada a declarar · 0.00 · nenhum

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 38 DFP lines, each with document, version, filing date, account and location.
