Auditor's report and auditor (factual section; no alert)

Excerpt checked literally: "Em nossa opinião, as demonstrações contábeis individuais acima referidas apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da MUNDIAL S.A. - PRODUTOS DE CONSUMO em 31 de dezembro de 2010, o desempenho de suas operações e os seus fluxos de caixa para o exercício findo naquela data, de acordo com as práticas contábeis adotadas no Brasil."

Auditor in the 2021 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples.

Auditor in the 2022 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples, Taticca Auditores Independentes S.S.

Auditor in the 2023 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples, Taticca Auditores Independentes S.S.

Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2012: Grant Thornton Auditores Independentes -> KPMG Auditores Independentes (transition: two firms in the 2012 FCA). The outgoing firm audited 3 consecutive fiscal years (2009 to 2011), by the start and end dates in the FCA.
- 2017: KPMG Auditores Independentes -> Baker Tilly Brasil RS Auditores Independentes Sociedade Simples (transition: two firms in the 2017 FCA). The outgoing firm audited 5 consecutive fiscal years (2012 to 2016), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2022: entry of Taticca Auditores Independentes S.S, with no other firm leaving.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

The reader found no mention of reverse factoring (risco sacado), forfaiting or supplier agreements in the notes of this DFP. Absence of mention does not prove absence of the operation.

Auditor's report

Type of opinion: unqualified
- [emphasis of matter] "Ênfase Conforme evidenciado na Nota Explicativa nº 1(b), a Companhia ainda apresenta uma situação patrimonial e financeira que requer forte gestão administrativa, além disso, possui créditos a receber de empresa relacionada no valor de R$ 279.605 mil, demonstrado no realizável a longo prazo, cuja recuperação é incerta, tendo em vista a situação patrimonial e financeira daquela empresa, que apresenta capital de giro negativo e passivo a descoberto (patrimônio líquido negativo). Estes fatores são indicativos de que a continuidade normal das operações da Companhia depende do êxito das medidas relacionadas pela Administração na referida Nota Explicativa. As demonstrações contábeis não incluem quaisquer ajustes decorrentes dessas incertezas e foram elaboradas de acordo com as práticas contábeis adotadas no Brasil aplicáveis a empresas em regime normal de operações. Conforme mencionado na Nota Explicativa nº 13, a Companhia possui créditos tributários adquiridos de terceiros, reconhecidos no ativo não circulante, para os quais o reconhecimento definitivo, no entanto, depende de decisão judicial em processo que está em andamento." (cut at the end of a sentence, original excerpt in Portuguese)
- [other matters] "Outros Assuntos Demonstrações do valor adicionado Examinamos, também, as demonstrações individual e consolidada do valor adicionado (DVA), referentes ao exercício findo em 31 de dezembro de 2010, cuja apresentação é requerida pela legislação societária brasileira para companhias abertas, e como informação suplementar pelas IFRS que não requerem

a apresentação da DVA. Essas demonstrações foram submetidas aos mesmos procedimentos de auditoria descritos anteriormente e, em nossa opinião, estão adequadamente apresentadas, em todos os seus aspectos relevantes, em relação às demonstrações contábeis tomadas em conjunto. Auditoria dos valores correspondentes ao exercício anterior Os valores correspondentes ao exercício findo em 31 de dezembro de 2009, apresentados para fins de comparação, foram anteriormente por nós auditados de acordo com as normas de auditoria vigentes por ocasião da emissão do relatório em 14.05.2010, que conteve as mesmas ênfases acima mencionadas.” (cut at the end of a sentence, original excerpt in Portuguese)

Reference Form
Form of 2011, version 4, filed on 2012-03-13.
The Reference Form lists no related-party transactions in the table. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
