Auditor's report and auditor (factual section; no alert)

no opinion excerpt was found in the text
Auditor in the 2021 FCA: Grant Thornton Auditores Independentes Ltda.
Auditor in the 2022 FCA: Grant Thornton Auditores Independentes Ltda.
Auditor in the 2023 FCA: Grant Thornton Auditores Independentes Ltda.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2013: BC Control Auditores Independentes -> individual auditor (name omitted). The outgoing firm audited 1 consecutive fiscal years (2010 to 2010), by the start and end dates in the FCA.
- 2014: individual auditor (name omitted) -> Verdus Auditores independentes. The outgoing firm audited 2 consecutive fiscal years (2012 to 2013), by the start and end dates in the FCA.
- 2018: Verdus Auditores independentes -> Conatus Auditores Independentes S.S. The outgoing firm audited 5 consecutive fiscal years (2014 to 2018), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2020: Conatus Auditores Independentes S.S -> Grant Thornton Auditores Independentes Ltda. The outgoing firm audited 2 consecutive fiscal years (2019 to 2020), by the start and end dates in the FCA.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval

of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Auditor's report
Type of opinion: qualified
- [basis for the opinion] “Base para opinião com ressalva sobre as demonstrações financeiras Conforme apresentado na nota explicativa No 9, a Companhia possui participações em controladas no montante líquido de R$ 145.647 mil em 31 de dezembro de 2010. Devido ao fato de não termos revisado as informações constantes nos balanços das investidas naquela data, o escopo de nossos trabalhos foi limitado e não temos como opinar sobre aquele valor registrado como participações em controladas, bem como seu resultado de equivalência patrimonial ou possíveis efeitos que pudessem gerar a revisão dos balanços daquelas companhias em 31 de dezembro de 2010.” (original excerpt in Portuguese)
- Excerpt omitted; see the auditor's report in the document

Reference Form
Form of 2011, version 3, filed on 2013-08-03.
The Reference Form lists no related-party transactions in the table. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
