Possible manipulation (engine v1, study 1)

Beneish M-score
- Value: component not computable: DEPI
- Alert by the study 1 rule: does not trigger alerts
- Rule: M > −1.78 (pre-registration, section 4)
- Percentile in sector and year: —
- Percentile in group and year: —
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: low

DSRI, days' sales in receivables index
- Value: 0.970 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 44 (n = 24)
- Percentile in group and year: 48 (n = 464)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

GMI, gross margin index
- Value: 0.426 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 19 (n = 24)
- Percentile in group and year: 6 (n = 474)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

AQI, asset quality index
- Value: 0.886 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 44 (n = 24)
- Percentile in group and year: 25 (n = 478)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

SGI, sales growth index
- Value: 1.268 (index)

M-score component; it has no rule of its own
Percentile in sector and year: 60 (n = 24)
Percentile in group and year: 70 (n = 475)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DEPI, depreciation index
Value: missing account: depreciation, cash flow lines in section 6.01.01
M-score component; it has no rule of its own
Percentile in sector and year: —
Percentile in group and year: —
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: low

SGAI, SG&A expenses index
Value: 0.903 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 44 (n = 24)
Percentile in group and year: 33 (n = 472)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

TATA, total accruals to total assets
Value: 0.028 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 77 (n = 24)
Percentile in group and year: 80 (n = 501)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

LVGI, leverage index
Value: 0.781 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 6 (n = 24)
Percentile in group and year: 9 (n = 488)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DPO jump
Value: −8.7 days
Alert by the study 1 rule: no
Rule: DPO change in the year's top decile among non-financial companies (≥ 90th percentile of computable values on the date: 19.1 days)
Percentile in sector and year: 20 (n = 23)
Percentile in group and year: 23 (n = 446)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Bargaining power with suppliers and a change in purchase mix (decision of 2026-11-07)

Implied interest rate minus average CDI
Value: 11.95 p.p.
Alert by the study 1 rule: yes
Rule: implied interest rate above the year's average CDI rate + 10 p.p. (pre-registration, section 4)
Percentile in sector and year: 66 (n = 22)

Percentile in group and year: 66 (n = 442)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Expensive debt, exchange differences and lease interest inside finance costs (decision of 2026-11-07)

Accruals to average total assets
Value: 0.029 (index)
Alert by the study 1 rule: does not trigger alerts
Percentile in sector and year: 77 (n = 24)
Percentile in group and year: 79 (n = 494)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

Financial risk (context only)

Altman Z'' (financial risk, context only)
Value: 4.044 (index)
Components: X1 = 0.339; X2 = −0.081; X3 = 0.007; X4 = 1.941 (indices)
Percentile in sector and year: 70 (n = 25)
The company's own history: fewer than 5 previous fiscal years with a value
- No cut-off zone: the available source does not define zones for Z''
- Coefficients estimated outside Brazil; bankruptcy models lose validity over time (Pereira and Martins 2015, p. 25)

Financial quality (context only)

Piotroski F (financial quality, context only)
Value: F = 3/9 (5 computable)
Signals:
- Return on assets (ROA): 1
- Operating cash flow on assets (CFO): 0
- Change in ROA: —
- Cash above earnings (ACCRUAL): 0
- Change in leverage: —
- Change in current ratio: 1
- No equity issuance (EQ_OFFER): —
- Change in gross margin: 1
- Change in asset turnover: —
- No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Restatement through the following year's comparative: no difference above the tolerance, or the next year's DFP did not exist yet on the date.

What was known on the date

53 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
no opinion excerpt was found in the text
Auditor in the 2020 FCA: Martinelli Auditores.
Auditor in the 2021 FCA: Martinelli Auditores.
Auditor in the 2022 FCA: Consult Auditores Independentes, Martinelli Auditores.
Auditor changes (one line per change, canonical name by the firm's CVM code):
- 2014: Morre Stephens Boeing Auditores Independentes S/S -> Mazars Auditores Independentes - Sociedade Simples Ltda. The outgoing firm audited 5 consecutive fiscal years (2009 to 2013), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2017: entry of Morre Stephens Boeing Auditores Independentes S/S, with no other firm leaving.
- 2018: Mazars Auditores Independentes - Sociedade Simples Ltda -> Martinelli Auditores. The outgoing firm audited 3 consecutive fiscal years (2014 to 2016), by the start and end dates in the FCA.
- 2018: exit of Morre Stephens Boeing Auditores Independentes S/S, with no other firm entering. The FCA does not have the dates needed to count the outgoing firm's fiscal years.
- 2022: entry of Consult Auditores Independentes, with no other firm leaving.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Document excerpts (copied; no alert)

Excerpts copied from the documents, with the page, and the Reference Form table. It is not a signal family: it generates no alert, score or ranking. Absence of mention does not prove absence.
How the reader was tested: 20 held-out cases, a single measurement with the frozen reader (c99c953): precision 0.962, coverage 0.962, literal check on 132 of 132 excerpts, no natural-person name (docs/leitor_medida.json).

Explanatory notes · Related parties
The reader found no note with "partes relacionadas" (related parties) in the title.

Explanatory notes · Reverse factoring and forfaiting
The reader found no mention of reverse factoring (risco sacado), forfaiting or supplier agreements in the notes of this DFP. Absence of mention does not prove absence of the operation.

Auditor's report
Type of opinion: unqualified
- Excerpt omitted; see the auditor's report in the document

Reference Form
Form of 2011, version 2, filed on 2012-04-26.
The Reference Form lists no related-party transactions in the table. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 36 DFP lines, each with document, version, filing date, account and location.

Engine
