Possible manipulation (engine v1, study 1)

Beneish M-score
- Value: component not computable: DEPI
- Alert by the study 1 rule: does not trigger alerts
- Rule: M > −1.78 (pre-registration, section 4)
- Percentile in sector and year: —
- Percentile in group and year: —
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: low

DSRI, days' sales in receivables index
- Value: 1.194 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 85 (n = 36)
- Percentile in group and year: 81 (n = 460)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

GMI, gross margin index
- Value: 0.834 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 24 (n = 36)
- Percentile in group and year: 19 (n = 478)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

AQI, asset quality index
- Value: 1.219 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 74 (n = 36)

Percentile in group and year: 86 (n = 474)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

SGI, sales growth index
Value: 0.663 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 1 (n = 36)
Percentile in group and year: 5 (n = 480)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DEPI, depreciation index
Value: missing account: depreciation, cash flow lines in section 6.01.01
M-score component; it has no rule of its own
Percentile in sector and year: —
Percentile in group and year: —
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: low

SGAI, SG&A expenses index
Value: 0.950 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 54 (n = 36)
Percentile in group and year: 36 (n = 471)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

TATA, total accruals to total assets
Value: −0.741 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 1 (n = 37)
Percentile in group and year: 3 (n = 501)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

LVGI, leverage index
Value: 0.885 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 15 (n = 36)
Percentile in group and year: 15 (n = 495)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DPO jump
Value: 157.2 days
Alert by the study 1 rule: yes
Rule: DPO change in the year's top decile among non-financial companies (≥ 90th percentile of computable values on the date: 26.5 days)
Percentile in sector and year: 96 (n = 36)
Percentile in group and year: 98 (n = 447)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Bargaining power with suppliers and a change in purchase mix (decision of 2026-11-07)

Implied interest rate minus average CDI
Value: −7.49 p.p.
Alert by the study 1 rule: no
Rule: implied interest rate above the year's average CDI rate + 10 p.p. (pre-registration, section 4)
Percentile in sector and year: 4 (n = 34)
Percentile in group and year: 3 (n = 444)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Expensive debt, exchange differences and lease interest inside finance costs (decision of 2026-11-07)

Accruals to average total assets
Value: −0.416 (index)
Alert by the study 1 rule: does not trigger alerts
Percentile in sector and year: 1 (n = 37)
Percentile in group and year: 3 (n = 500)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

Financial risk (context only)

Altman Z'' (financial risk, context only)
Value: −3.393 (index)
Components: X1 = −0.296; X2 = −0.016; X3 = −0.217; X4 = 0.057 (indices)
Percentile in sector and year: 9 (n = 40)
The company's own history: fewer than 5 previous fiscal years with a value
- No cut-off zone: the available source does not define zones for Z''
- Coefficients estimated outside Brazil; bankruptcy models lose validity over time (Pereira and Martins 2015, p. 25)

Financial quality (context only)

Piotroski F (financial quality, context only)
Value: F = 3/9 (8 computable)
Signals:
- Return on assets (ROA): 0
- Operating cash flow on assets (CFO): 1
- Change in ROA (ΔROA): 0
- Cash above earnings (ACCRUAL): 1
- Change in leverage (ΔLEVER): 1
- Change in current ratio (ΔLIQUID): 0
- No equity issuance (EQ_OFFER): —
- Change in gross margin (ΔMARGIN): 0
- Change in asset turnover (ΔTURN): 0
- No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Restatement through the following year's comparative: no difference above the tolerance, or the next year's DFP did not exist yet on the date.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Com Ressalva (qualified).
Excerpt checked literally: "Em nossa opinião, as demonstrações contábeis acima referidas, individuais e consolidadas, ressalvados os assuntos descritos nos parágrafos 6 a 8 anteriores, apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da TECNOSOLO ENGENHARIA S.A., em 31 de dezembro de 2013, o desempenho de suas operações, o fluxo de caixa e a demonstração do valor adicionado para o exercício findo naquela data, de acordo com as práticas contábeis adotadas no Brasil.Ênfase10."
Auditor in the 2021 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor in the 2022 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor in the 2023 FCA: Tag Auditoria e Consultoria Empresarial S/S.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2012: Audipec Auditoria e Perícia Contábil S/S -> Tag Auditoria e Consultoria Empresarial S/S. The outgoing firm audited 7 consecutive fiscal years (2005 to 2011), by the start and end dates in the FCA.
- 2016: Tag Auditoria e Consultoria Empresarial S/S -> Audipec Auditoria e Perícia Contábil S/S (transition: two firms in the 2016 FCA). The outgoing firm audited 4 consecutive fiscal years (2012 to 2015), by the start and end dates in the FCA.
- 2021: Audipec Auditoria e Perícia Contábil S/S -> Tag Auditoria e Consultoria Empresarial S/S. The outgoing firm audited 5 consecutive fiscal years (2016 to 2020), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Resolution No. 23/2021, in force when the new firm started).

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful

accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 36 DFP lines, each with document, version, filing date, account and location.

Engine

motor v1 (estudo 1), branch estudo-1-final, commit 8c9a823; chiocca.v2 (produto, fases B a E).
