Possible manipulation (engine v1, study 1)

Non-recurring weight (financial companies)
- Value: 0.053 (index)
- Alert by the study 1 rule: no
- Rule: non-recurring weight in the year's top decile among financial companies (≥ 90th percentile of computable values on the date: 1.009)
- Percentile in sector and year: fewer than 10 companies with a computable value
- Percentile in group and year: 21 (n = 21)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

Financial risk (context only)

Altman Z'' (financial risk, context only)
- Value: does not apply to financial companies
- Percentile in sector and year: —
- The company's own history: fewer than 5 previous fiscal years with a value

Financial quality (context only)

Piotroski F (financial quality, context only)
- Value: does not apply to financial companies

Changes

Highlighted in the following year's comparative: none.
Highlighted: differences in totals and key lines (total assets, current liabilities, non-current liabilities, equity, net revenue, net income and operating cash flow) above 1% of total assets of the version used. The other differences (reclassifications between lines and smaller differences) stay in the full list.
Full list: 19 accounts above the R$1,000 tolerance (group a, totals and key lines: 0; group b, reclassifications: 19), in the annex at the end.

What was known on the date

- DFP 2016, v1: 2017-07-31
- FCA 2018, v1: 2018-01-17
- DFP 2017, v1: 2018-02-08
- DFP 2018, v1: 2019-02-07
- DFP 2018, v2: 2019-03-07

- DFP 2018, v3: 2019-03-07
- DFP 2018, v4: 2019-03-08
- DFP 2019, v1: 2020-02-18

DFP and FCA filed with the CVM by the reference date; ITR and material facts come in later phases.

Data quality

10 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
Excerpt checked literally: "Em nossa opinião, essas demonstrações do valor adicionado foram adequadamente elaboradas, em todos os aspectos relevantes, segundo os critérios definidos nesse Pronunciamento Técnico e são consistentes em relação às demonstrações contábeis individuais e consolidadas tomadas em conjunto."
Auditor in the 2017 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2018 FCA: PricewaterhouseCoopers Auditores Independentes, PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2019 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor changes: none in the FCAs filed by the date.
Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 2 DFP lines, each with document, version, filing date, account and location.

Engine

motor v1 (estudo 1), branch estudo-1-final, commit 8c9a823; chiocca.v2 (produto, fases B a E).
