Investigation: IRB - BRASIL RESSEGUROS S.A. (CVM code 24180), fiscal year 2019, as it was on 2020-04-30

Statistical signal based on public financial statements. Not an accusation, not investment advice.

Company

Sector: Seguradoras e Corretoras (origin: FCA); group: financial.
Trading codes (2019 FCA, version 1, filed on 2019-01-29): IRBR3 (Ações Ordinárias, Bolsa, since 2017-07-31).

Document used

2019 DFP, version 1, filed on 2020-02-18; origin: ENET; type: consolidated; original scale: —.
Versions known on the date: 1 (2020-02-18).
Document at the CVM: http://www.rad.cvm.gov.br/ENETCONSULTA/frmDownloadDocumento.aspx?CodigoInstituicao=1&NumeroSequencialDocumento=91057
- Structure read from a document filed after the date (study 1 behaviour, amendment 8)
- ENET version: the cache keeps values already in reais and did not record the page's scale (fetches before 2026-11-09)

Possible manipulation (engine v1, study 1)

Non-recurring weight (financial companies)
Value: 0.035 (index)
Alert by the study 1 rule: no
Rule: non-recurring weight in the year's top decile among financial companies (≥ 90th percentile of computable values on the date: 1.839)
Percentile in sector and year: fewer than 10 companies with a computable value
Percentile in group and year: 31 (n = 18)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

Financial risk (context only)

Altman Z'' (financial risk, context only)
Value: does not apply to financial companies
Percentile in sector and year: —
The company's own history: fewer than 5 previous fiscal years with a value

Financial quality (context only)

Piotroski F (financial quality, context only)
Value: does not apply to financial companies

Changes

Restatement through the following year's comparative: no difference above the tolerance, or the next year's DFP did not exist yet on the date.

What was known on the date

- DFP 2016, v1: 2017-07-31
- DFP 2017, v1: 2018-02-08
- FCA 2019, v1: 2019-01-29
- DFP 2018, v1: 2019-02-07
- DFP 2018, v2: 2019-03-07
- DFP 2018, v3: 2019-03-07
- DFP 2018, v4: 2019-03-08
- DFP 2019, v1: 2020-02-18

DFP and FCA filed with the CVM by the reference date; ITR and material facts come in later phases.

Data quality

10 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

the open-data opinions section is only for the latest DFP version; the version used came from ENET
Auditor in the 2017 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2018 FCA: PricewaterhouseCoopers Auditores Independentes, PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2019 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor changes: none in the FCAs filed by the date.
Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Structure read from a document filed after the date (study 1 behaviour, amendment 8)
- ENET version: the cache keeps values already in reais and did not record the page's scale (fetches before 2026-11-09)
- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 2 DFP lines, each with document, version, filing date, account and location.

Engine

motor v1 (estudo 1), branch estudo-1-final, commit 8c9a823; chiocca.v2 (produto, fases B a E).
