Auditor's report and auditor (factual section; no alert)

Auditor's report: Com Ressalva (qualified).
no opinion excerpt was found in the text
Auditor in the 2021 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples.
Auditor in the 2022 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples, Taticca Auditores Independentes S.S.
Auditor in the 2023 FCA: Baker Tilly Brasil RS Auditores Independentes Sociedade Simples, Taticca Auditores Independentes S.S.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2012: Grant Thornton Auditores Independentes -> KPMG Auditores Independentes. The outgoing firm audited 3 consecutive fiscal years (2009 to 2011), by the start and end dates in the FCA.
- 2017: KPMG Auditores Independentes -> Baker Tilly Brasil RS Auditores Independentes Sociedade Simples (transition: two firms in the 2017 FCA). The outgoing firm audited 5 consecutive fiscal years (2012 to 2016), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2022: entry of Taticca Auditores Independentes S.S, with no other firm leaving.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial

companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
