- Change in current ratio (ΔLIQUID): 1
- No equity issuance (EQ_OFFER): —
- Change in gross margin (ΔMARGIN): 0
- Change in asset turnover (ΔTURN): 0
- No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Highlighted in the following year's comparative: none.
Highlighted: differences in totals and key lines (total assets, current liabilities, non-current liabilities, equity, net revenue, net income and operating cash flow) above 1% of total assets of the version used. The other differences (reclassifications between lines and smaller differences) stay in the full list.
Full list: 7 accounts above the R$1,000 tolerance (group a, totals and key lines: 1; group b, reclassifications: 6), in the annex at the end.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Com Ressalva (qualified).
Excerpt checked literally: "Em nossa opinião, exceto quanto aos efeitos correspondentes ao assunto descrito no parágrafo sobre a base para opinião com ressalva, as demonstrações contábeis acima referidas apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da Metalgráfica Iguaçu S.A. em 31 de dezembro de 2011 e 2010, o desempenho de suas operações, os seus fluxos de caixa e o valor adicionado para os exercícios findos naquelas datas, de acordo com as práticas contábeis adotadas no Brasil.Outros AssuntosConforme mencionado na Nota 16, a Companhia possui créditos a recebera Kremon do Brasil S.A."
Auditor in the 2020 FCA: Martinelli Auditores.
Auditor in the 2021 FCA: Martinelli Auditores.
Auditor in the 2022 FCA: Consult Auditores Independentes, Martinelli Auditores.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2014: Morre Stephens Boeing Auditores Independentes S/S -> Mazars Auditores Independentes - Sociedade Simples Ltda. The outgoing firm audited 5 consecutive fiscal years (2009 to 2013), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).
- 2017: entry of Morre Stephens Boeing Auditores Independentes S/S, with no other firm leaving.
- 2018: Mazars Auditores Independentes - Sociedade Simples Ltda -> Martinelli Auditores. The outgoing firm audited 3 consecutive fiscal years (2014 to 2016), by the start and end dates in the FCA.
- 2018: exit of Morre Stephens Boeing Auditores Independentes S/S, with no other firm entering. The FCA does not have the dates needed to count the outgoing firm's fiscal years.
- 2022: entry of Consult Auditores Independentes, with no other firm leaving.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by

chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
