  - No long-term debt in either year: the change in leverage is zero and the signal is 0 (project choice; the article only defines fell = 1, rose = 0, p. 8)

Auditor's report
Type of opinion: qualified
- Excerpt omitted; see the auditor's report in the document
- [emphasis of matter] “Ênfase Conforme descrito na nota explicativa 16 “a”, a Cia. é parte passiva em ação movida pela União, no montante de R$ 202 milhões, todavia de acordo com seus assessores jurídicos o máximo de perda projetada seria em 31 de dezembro de 2015 de R$ 69.841 mil (R$ 61.676 mil em 31/12/14), ainda de acordo, com a nota explicativa 16 “b”, a Cia. pleiteia junto à justiça, a restituição de valores recolhidos para o desembaraço de importações de trigo, vindas da Argentina, que por ser membro da ALADI, estavam isentas do respectivo tributo. A ação já foi ganha em segunda instância. O montante de restituição estimado pelos assessores jurídicos é de R$ 110 milhões, valor este suficiente para fazer frente aos passivos devidos pela Cia., inclusive contra a própria UNIÃO. No entanto, devido à demora nos tramites judiciais a situação econômica e financeira da Cia. mostra-se desfavorável. Adicionalmente, investimentos realizados em novos negócios não trouxeram retorno, agravando assim, a situação financeira da Cia. As demonstrações contábeis foram preparadas no pressuposto da continuidade normal dos negócios da Companhia. São Paulo, 29 de abril de 2016.” (cut at the end of a sentence, original excerpt in Portuguese)

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, a header line (years, column titles) may still come out as an excerpt: in the reader's measurement, 1 of 19 header texts of the held-out cases came out as excerpts.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
