Value: 0.628 (index)
Components: X1 = 0.124; X2 = −0.034; X3 = −0.006; X4 = −0.027 (indices)

The company's own history: fewer than 5 previous fiscal years with a value
- No cut-off zone: the available source does not define zones for Z''

Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
Excerpt checked literally: "Em nossa opinião, as demonstrações financeiras acima referidas apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da Brasil Foodservice Group S.A. em 31 de dezembro de 2011, o desempenho de suas operações e os seus fluxos de caixa para o exercício findo naquela data, de acordo com as práticas contábeis adotadas no Brasil e de acordo com as normas internacionais de relatório financeiro (IFRS) emitidas pelo International Accounting Standards Board - IASB e as práticas contábeis adotadas no Brasil."
Auditor in the 2013 FCA: HORWATH, BENDORAYTES, AIZENMAN e Cia Auditores Independentes.
Auditor in the 2014 FCA: HORWATH, BENDORAYTES, AIZENMAN e Cia Auditores Independentes.
Auditor in the 2015 FCA: HLV Auditores - Sociedade Simples.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2011: entry of Ernst & Young Auditores Independentes S.S., with no other firm leaving.
- 2012: exit of Ernst & Young Auditores Independentes S.S., with no other firm entering. The FCA does not have the dates needed to count the outgoing firm's fiscal years.
- 2015: HORWATH, BENDORAYTES, AIZENMAN e Cia Auditores Independentes -> HLV Auditores - Sociedade Simples. The outgoing firm audited 2 consecutive fiscal years (2012 to 2013), by the start and end dates in the FCA.

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation

and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Auditor's report
Type of opinion: unqualified
- [emphasis of matter] “Ênfase Sem ressalvar nossa opinião, chamamos atenção para o fato que a Companhia ainda não aufere receitas operacionais e, consequentemente, apurou prejuízo de R$ 6.668 mil no exercício findo em 31 de dezembro de 2011. Adicionalmente, em 31 de dezembro de 2011, a Companhia apresenta total de passivos superior ao total de ativos, os quais são substancialmente compostos por saldos a receber de partes relacionadas. Essas condições indicam a existência de incerteza que pode levantar dúvida quanto à capacidade de continuidade operacional da entidade. Conforme detalhado na Nota 1, a liquidação dos passivos assumidos está condicionada ao sucesso no recebimento dos créditos com partes relacionadas, bem como a aportes financeiros de seus acionistas. As demonstrações financeiras foram preparadas no pressuposto de continuidade normal das operações e não contemplam quaisquer ajustes que poderiam decorrer do fato da Companhia não obter êxito com as referidas medidas.” (original excerpt in Portuguese)
- Excerpt omitted; see the auditor's report in the document

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, a header line (years, column titles) may still come out as an excerpt: in the reader's measurement, 1 of 19 header texts of the held-out cases came out as excerpts.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
