Possible manipulation (engine v1, study 1)

Beneish M-score
- Value: component not computable: DEPI
- Alert by the study 1 rule: does not trigger alerts
- Rule: M > −1.78 (pre-registration, section 4)
- Percentile in sector and year: —
- Percentile in group and year: —
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: low

DSRI, days' sales in receivables index
- Value: 2.688 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 98 (n = 25)
- Percentile in group and year: 97 (n = 467)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

GMI, gross margin index
- Value: −0.086 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 14 (n = 25)
- Percentile in group and year: 3 (n = 477)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

AQI, asset quality index
- Value: 1.049 (index)
- M-score component; it has no rule of its own
- Percentile in sector and year: 58 (n = 25)
- Percentile in group and year: 65 (n = 472)
- The company's own history: fewer than 5 previous fiscal years with a value
- Confidence in the data: medium

SGI, sales growth index

Value: 0.019 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 2 (n = 25)
Percentile in group and year: 0 (n = 478)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DEPI, depreciation index
Value: zero denominator: DEPI, t depreciation rate
M-score component; it has no rule of its own
Percentile in sector and year: —
Percentile in group and year: —
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: low

SGAI, SG&A expenses index
Value: 42.123 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 98 (n = 25)
Percentile in group and year: 100 (n = 471)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

TATA, total accruals to total assets
Value: −0.279 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 18 (n = 25)
Percentile in group and year: 6 (n = 494)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

LVGI, leverage index
Value: 1.228 (index)
M-score component; it has no rule of its own
Percentile in sector and year: 58 (n = 25)
Percentile in group and year: 82 (n = 486)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

DPO jump
Value: 2,686.0 days
Alert by the study 1 rule: yes
Rule: DPO change in the year's top decile among non-financial companies (≥ 90th percentile of computable values on the date: 35.1 days)
Percentile in sector and year: 98 (n = 25)
Percentile in group and year: 100 (n = 449)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Bargaining power with suppliers and a change in purchase mix (decision of 2026-11-07)

Implied interest rate minus average CDI
Value: 6.74 p.p.
Alert by the study 1 rule: no
Rule: implied interest rate above the year's average CDI rate + 10 p.p. (pre-registration, section 4)

Percentile in sector and year: 26 (n = 25)
Percentile in group and year: 51 (n = 438)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium
Alternative explanations: Expensive debt, exchange differences and lease interest inside finance costs (decision of 2026-11-07)

Accruals to average total assets
Value: −0.271 (index)
Alert by the study 1 rule: does not trigger alerts
Percentile in sector and year: 14 (n = 25)
Percentile in group and year: 6 (n = 494)
The company's own history: fewer than 5 previous fiscal years with a value
Confidence in the data: medium

Financial risk (context only)

Altman Z" (financial risk, context only)
Value: −11.037 (index)
Components: X1 = −0.743; X2 = −1.466; X3 = −0.140; X4 = −0.425 (indices)
Percentile in sector and year: 16 (n = 28)
The company's own history: fewer than 5 previous fiscal years with a value
- No cut-off zone: the available source does not define zones for Z"
- Coefficients estimated outside Brazil; bankruptcy models lose validity over time (Pereira and Martins 2015, p. 25)

Financial quality (context only)

Piotroski F (financial quality, context only)
Value: F = 2/9 (8 computable)
Signals:
  - Return on assets (ROA): 0
  - Operating cash flow on assets (CFO): 1
  - Change in ROA: 0
  - Cash above earnings (ACCRUAL): 1
  - Change in leverage: 0
  - Change in current ratio: 0
  - No equity issuance (EQ_OFFER): —
  - Change in gross margin: 0
  - Change in asset turnover: 0
- No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement

Changes

Highlighted in the following year's comparative: none.
Highlighted: differences in totals and key lines (total assets, current liabilities, non-current liabilities, equity, net revenue, net income and operating cash flow) above 1% of total assets of the version used. The other differences (reclassifications between lines and smaller differences) stay in the full list.
Full list: 1 accounts above the R$1,000 tolerance (group a, totals and key lines: 0; group b, reclassifications: 1), in the annex at the end.

What was known on the date

- DFP 2010, v1: 2011-03-31
- FCA 2011, v1: 2011-03-31
- FCA 2011, v2: 2011-05-18
- DFP 2011, v1: 2012-03-20
- DFP 2012, v1: 2013-04-08

DFP and FCA filed with the CVM by the reference date; ITR comes in a later phase.
Material facts and market notices filed by the date (IPE open data, since 2010): 1 material fact documents and 34 market notice documents.
No material fact filed in the 24 months before the date (from 2023-01-01 to 2024-12-31).
Older material facts, the market notices and the link to each document are in the JSON and on screen.
Material facts and market notices filed with the CVM by the date, from the IPE open data (since 2010): filing date, category, subject (as filed, in Portuguese) and link. The content of the documents is not downloaded, read or summarized, and the list generates no alert, score or ranking. The counts are of documents: versions, resubmissions and English versions count separately; in the list, versions of the same document and documents with the same date, category and subject appear on a single line, with a link to each one.

Data quality

53 applicable checks; 0 failed.

Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
Excerpt checked literally: "Em nossa opinião as demonstrações financeiras acima referidas apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e contábil da da COMPANHIA INDUSTRIAL SCHLOSSER S.A., em 31 de dezembro de 2011, o desempenho de suas operações e os seus fluxos de caixa para o exercício findo naquela data, de acordo com as práticas contábeis adotadas no Brasil.Outros assuntosA Companhia atravessa a fase inicial pós-aprovação do seu plano de recuperação judicial, no qual foi apreciado e aprovado por unanimidade pelos credores na assembléia geral em 19 de outubro de 2011."
Auditor in the 2020 FCA: PSW Brasil Auditores Independentes.
Auditor in the 2021 FCA: PSW Brasil Auditores Independentes.
Auditor in the 2022 FCA: PSW Brasil Auditores Independentes.
Auditor changes (one line per change, canonical name by the firm's CVM code):
- 2011: BDO Trevisan Auditores Independentes -> Müller & Prei Auditores Independentes S/S (transition: two firms in the 2011 FCA). The outgoing firm audited 1 consecutive fiscal years (2010 to 2010), by the start and end dates in the FCA.
- 2016: Müller & Prei Auditores Independentes S/S -> PSW Brasil Auditores Independentes. The outgoing firm audited 5 consecutive fiscal years (2011 to 2015), by the start and end dates in the FCA. The change coincides with the end of the 5-fiscal-year term and is compatible with the rotation rule (art. 31 of CVM Instruction No. 308/1999, in force when the new firm started).

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Document excerpts (copied; no alert)

Excerpts copied from the documents, with the page, and the Reference Form table. It is not a signal family: it generates no alert, score or ranking. Absence of mention does not prove absence.
How the reader was tested: 22 held-out cases, a single measurement with the frozen reader (dd688da): precision 0.973, coverage 0.915, literal check on 146 of 146 excerpts, no natural-

person name (docs/leitor_medida_f1_2.json).

Explanatory notes · Related parties
The reader found no note with "partes relacionadas" (related parties) in the title.

Explanatory notes · Reverse factoring and forfaiting
The reader found no mention of reverse factoring (risco sacado), forfaiting or supplier agreements in the notes of this DFP. Absence of mention does not prove absence of the operation.

Auditor's report
Type of opinion: unqualified
- [other matters] “Outros assuntos A Companhia atravessa a fase inicial pós-aprovação do seu plano de recuperação judicial, no qual foi apreciado e aprovado por unanimidade pelos credores na assembléia geral em 19 de outubro de 2011. Posteriormente, em 07 de novembro de 2011, o juízo da recuperação judicial ratificou a aprovação do plano pela assembléia geral, e concedeu a recuperação judicial de forma retroativa à data da assembléia geral. Até a presente data, as atividades da Companhia no ano de 2011 continuam totalmente paralisadas.” (original excerpt in Portuguese)
- Excerpt omitted; see the auditor's report in the document

Reference Form
Form of 2012, version 1, filed on 2012-05-02.
The Reference Form lists no related-party transactions in the table. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, a header line (years, column titles) may still come out as an excerpt: in the reader's measurement, 1 of 19 header texts of the held-out cases came out as excerpts.

How the engine was tested
In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits
- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations
- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts

Evidence in the JSON: 39 DFP lines, each with document, version, filing date, account and location.

Engine
motor v1 (estudo 1), branch estudo-1-final, commit 8c9a823; chiocca.v2 (produto, fases B a F1);

leitor-f1-2 (commit dd688da). The generation date is in the demo manifest (demo/manifesto.json).

Today's information (outside the reference date)
