Auditor's report and auditor (factual section; no alert)

Auditor's report: Sem Ressalva (unqualified).
Excerpt checked literally: "Em nossa opinião, as demonstrações contábeis acima referidas apresentam adequadamente, em todos os aspectos relevantes, a posição patrimonial e financeira da Instituição e da Instituição e suas controladas em 31 de dezembro de 2023, o desempenho de suas operações e os seus respectivos fluxos de caixa, bem como o desempenho consolidado de suas operações e os seus fluxos de caixa consolidados para o semestre e exercício findos nessa data, de acordo com as práticas contábeis adotadas no Brasil, aplicáveis às instituições autorizadas a funcionar pelo Banco Central do Brasil (Bacen)."
Auditor in the 2021 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2022 FCA: PricewaterhouseCoopers Auditores Independentes.
Auditor in the 2023 FCA: PricewaterhouseCoopers Auditores Independentes, PricewaterhouseCoopers Auditores Independentes.
Auditor changes (one line per change, canonical name by the firm's CVM code):

- 2011: Deloitte Touche Tohmatsu Auditores Independentes -> PricewaterhouseCoopers Auditores Independentes. The outgoing firm audited 10 consecutive fiscal years (2001 to 2010), by the start and end dates in the FCA. The change coincides with the end of the 10-fiscal-year term and is compatible with the rotation rule (art. 31-A of CVM Instruction No. 308/1999, in force when the new firm started).

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
