Altman Z'' (financial risk, context only)

  The company's own history: fewer than 5 previous fiscal years with a value

Piotroski F (financial quality, context only)
  Value: F = 2/9 (7 computable)

    - Change in asset turnover: 0
  - No equity issuance (EQ_OFFER), from the cash flow statement: 6.03 lines of the frozen "emissões" pattern (reconnaissance, part 4.2), only those about shares or capital, as the article defines it ("did not issue common equity", p. 9); adaptation: preferred shares also count, because in Brazil they are equity, and the line is identified by text in the cash flow statement
  - No long-term debt in either year: the change in leverage is zero and the signal is 0 (project choice; the article only defines fell = 1, rose = 0, p. 8)

Auditor rotation: under CVM Resolution No. 23/2021, art. 31, the same independent auditor may not serve the same client for more than five consecutive fiscal years, with a minimum interval

of three fiscal years before being hired again; under art. 31-A, the term is up to ten consecutive fiscal years when the company has a statutory audit committee in permanent operation and the auditor is a firm. The Resolution has been in force since 2021-04-01 (art. 41); before that, the equivalent rule was in arts. 31 and 31-A of CVM Instruction No. 308/1999, revoked by the Resolution (art. 40, I). A change of auditor is a fact, not an alert.

Auditor's report
Type of opinion: unqualified
- [other matters] “Outros assuntos Demonstração do valor adicionado Examinamos, também, a Demonstração do Valor Adicionado (DVA), referente ao exercício findo em 31 de dezembro de 2014, cuja apresentação é requerida pela legislação societária brasileira para companhias abertas. Essa demonstração foi submetida aos mesmos procedimentos de auditoria descritos anteriormente e, em nossa opinião, está adequadamente apresentada, em todos os seus aspectos relevantes, em relação às demonstrações contábeis tomadas em conjunto.” (original excerpt in Portuguese)
- [emphasis of matter] “Ênfase Conforme descrito na nota explicativa 16 “a”, a Cia. é parte passiva em ação movida pela União, no montante de R$ 202 milhões, todavia de acordo com seus assessores jurídicos o máximo de perda projetada seria em 31 de dezembro de 2014 de R$ 61.675 mil, ainda de acordo, com a nota explicativa 16 “b”, a Cia. pleiteia junto a justiça, a restituição de valores recolhidos para o desembaraço de importações de trigo, vindas da Argentina, que por ser membro da ALADI, estavam isentas do respectivo tributo. A ação já foi ganha em primeira instância. O montante de restituição estimado pelos assessores jurídicos é de R$ 110 milhões, valor este suficiente para fazer frente aos passivos devidos pela Cia., inclusive contra a própria UNIÃO. No entanto, devido a demora nos tramites judiciais a situação econômica e financeira da Cia. mostra-se desfavorável. Adicionalmente, investimentos realizados em novos negócios não trouxeram retorno, agravando assim, a situação financeira da Cia. As demonstrações foram preparadas no pressuposto da continuidade normal dos negócios da Companhia. São Paulo, 12 de fevereiro de 2015.” (cut at the end of a sentence, original excerpt in Portuguese)

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested

In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits

- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations

- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
