Auditor's report
Type of opinion: unqualified
- [key audit matters] “Principais assuntos de auditoria (PAA) são aqueles que, em nosso julgamento profissional, foram os mais significativos em nossa auditoria do exercício corrente. Esses assuntos foram tratados no contexto de nossa auditoria das demonstrações contábeis individuais e consolidadas como um todo e na formação de nossa opinião sobre essas demonstrações contábeis individuais e consolidadas e, portanto, não expressamos uma opinião separada sobre esses assuntos. Dessa forma, determinamos que o assunto descrito abaixo é o principal assunto de auditoria a ser comunicado em nosso relatório. Avaliação do valor recuperável dos ativos intangíveis e ágio na aquisição de investimentos Conforme descrito nas Notas Explicativas nºs 10 e 12 – “Investimentos” e “Intangível, a Companhia por meio da aquisição de controle societário de outras Companhias, expandiu suas atividades em diversas regiões do país. Dessa forma, os ativos da Companhia são compostos de parcela significativa de ativos intangíveis, derivados, principalmente de ágios constituídos em transações de combinações de negócios.” (cut at the end of a sentence, original excerpt in Portuguese)
- [other matters] “Outros assuntos Demonstrações do valor adicionado As demonstrações individual e consolidada do valor adicionado (DVA) referentes ao exercício findo em 31 de dezembro de 2018, elaboradas sob a responsabilidade da administração da Companhia, e apresentadas como informação suplementar para fins de IFRS, foram submetidas a procedimentos de auditoria

executados em conjunto com a auditoria das demonstrações contábeis da Companhia. Para a formação de nossa opinião, avaliamos se essas demonstrações estão conciliadas com as demonstrações contábeis e registros contábeis, conforme aplicável, e se a sua forma e conteúdo estão de acordo com os critérios definidos no Pronunciamento Técnico CPC 09 - Demonstração do Valor Adicionado. Em nossa opinião, essas demonstrações do valor adicionado foram adequadamente elaboradas, em todos os aspectos relevantes, segundo os critérios definidos nesse Pronunciamento Técnico e são consistentes em relação às demonstrações contábeis individuais e consolidadas tomadas em conjunto." Reference Form
The Reference Form for this fiscal year was not available on the date. It is the only version available in the open data; earlier versions are not there.

Limits of this section:
- In real documents, about 22% of the excerpts come out omitted by the name detector, including names of companies outside the registry.
- In tables, header lines (years, column titles) may come out as excerpts; the held-out cases had no tables with multi-line headers.

How the engine was tested
In study 1, engine v1 detected 7 of 13 detectable cases, with 108.3 false alarms per detected case over the whole period and an alert rate of 49.9% among evaluated non-financial company-years (docs/summary.md).

Limits
- No alert is not a clean bill of health. In Dechow, Sloan and Sweeney (1995), the most powerful accruals model rejected 'no manipulation' for only 28.1% of 32 companies sanctioned by the SEC (Table 7, p. 32).
- In study 1, 49.9% of evaluated non-financial company-years (48.3% including financial companies) were in alert, and the number of detections did not beat chance in a descriptive test done after the result: 7 detections in 13 detectable cases, against 7.37 expected by chance without assuming independent years (8.56 assuming independent years).
- Risk models use numbers that may be manipulated (Pereira and Martins 2015, p. 29). That is why the three families are not added up.

Limitations
- Context indicators (Altman Z'' and Piotroski F) were not validated in Brazil by this project and do not trigger alerts
